Pros: ++Quite intriguing killer origin story, with nice cutscenes and solid writing +Good pixelart, some pretty gory details +Surprisingly, there's some voice acting here and there and more surprisingly it is actually well done Cons: --Basically a long collect-a-thon like a Slender game, I literally spent the last hour of my playtime looking for what I guess are the last two items you need before finally giving up due to boredom --Remaining survivors, instead of sticking together give you "quests" like "Turn up the boiler, my bed is too cold!" or "Put out the fires because I drank 18 cups of coffee! This is funny right?! Laugh, please!!!" --Killer is a hilarious FNAF clone at best and utterly annoying at worst (which he is most of the time). He turns up way too often (approximately 2 times a minute) and when he does he's just sort of there. No musical cue while you're being stalked makes it pretty drab - some of the lines he says when he appears are somewhat funny, though this can be seen as a good or a bad thing) --Has the typical signs of lazy RPG Maker devs such as being able to walk through walls and out of bounds of the level area, player sprite turning invisible, events interrupting one another etc etc I really wanted to like this game since RPG Maker games and slasher movies are two my passions, but I just can't recommend it the way it is. Rework the killer mechanics, streamline the collect-a-thon, fix the worst bugs and I'd probably change my mind.. This game might not be huge or have tons of things to do, but I really enjoyed it. Not only did it have very unsettling parts (with good music too!) but a few things made me actually laugh out loud. The few frustrating elements can overlooked. For the price I say it is worth it. Thanks for the game.
