Oh my, people still playing that? I had a friend in college who once convinced a co-worker to play ME1 on multiplayer. Turned out he went to the same college as my girlfriend (we are now broken up, but we're still good friends). After he showed her the first level with a few of the NCR troopers, she threw the controller at him and said "you're done". He had no idea what she was talking about. I would play if I could, but i really just don't like those games enough. I enjoyed them for what they were, but i just found them too complicated. I understand it's been 5 years since the last game, but don't make me revisit the base model.

The different version's were good, but nothing crazy like what they added to the later versions. What does that matter? The foundation of what you want to add is the same, just with different concepts and different mechanics. The multiplayer, while it isn't anything special, is the same. I really don't think the fundamental idea is the same. I played those games as a kid and loved them. I've only played ME1 a few times, and played ME2 for a few hours. I really, really just want to try a single player campaign again. I would play if I could, but i really just don't like those games enough. I enjoyed them for what they were, but i just found them too complicated. I understand it's been 5 years since 82157476af
